Key Words: environment, sustainable, education, films, information, public

The “Green Screen Café” is intended to complement the ORD sessions by showing how science and data that EPA uses and develops are viewed by others outside the Agency. This would be an additional attraction of the Science Forum, where we would show films after hours. We would plan to run the Green Screen Café on Wednesday evening for anyone who cannot attend the reception on Capitol Hill. The Café would be a relaxed environment in which attendees could sit back and watch superb films related to our environmental themes. We will provide popcorn if possible.

We have identified several award-winning candidate films (e.g., *A Celebration of Birds* with Roger Tory Peterson (a talk may be given in conjunction with this film), *The Air We Breathe*, *Greening Business*, *The Next Industrial Revolution*, *Cities*, *Fisheries - Beyond The Crisis*, and three of the yet-to-be-aired programs from the PBS series *Journey to Planet Earth* narrated by Matt Damon. We will be viewing these films in the next couple of weeks to see which would be best. Most run between 45 and 55 minutes.
